#1 CAS Institute of Healthcare Technology Co.,Ltd

A research institute that focuses on smart health industry, currently cooperating with 4 projects on partnerships with laboratories in sensor for human motion, medical and rehabilitation robots, nano technology. The institute builds a digital health industry cluster, as well as an Internet + digital health professional service system platform centered on Big Data.

#2 Nanjing Ruiqi Intelligent Transportation Technology Industry Research Institute Co.,Ltd

A research institute that focuses on the development of smart transportation technology: road and bridge stations, operation and management of rail transportation, traffic safety, intelligent transportation management and control system, and many more. The ITS research center is affiliated with Southeast University.

#3 Jiangsu Saibo Intelligent Manufacturing Research Institute Co. Ltd

A research institute that focuses on composite engineering automation technology, with application in 3D printing, intelligent manufacturing and new materials. The enterprise aims to solve the need of green intelligence and intensive development in the Foundry industry, by doing R&D on new materials and composite materials molding technology.

#4 Nanjing Nanxin Pharmaceutical Technology Research Institute Co. Ltd

Through application of AI and cloud computing in chemistry, the company sets up innovation platforms of chemical products and services. This to improve the efficiency and success rate of drug development in terms of data-driven drug design, formulation etc. This Institutes now has 8 spin offs under development.

#5 Nanjing Hosta Motion Control Co., Ltd

Nanjing Hosta Motion Control Co., Ltd. is a company that provides design and technical services in the field of motion control. Their purpose is to improve the communication system by providing any kind of sophisticated machines, cables and panels. They have developed the PROFINET communication technology and are experienced in industrial automation system integration.

#6 Nanjing Xianzhi Zailing Tech Co., Ltd

Focus on an online service platform for elevator safety management, incorporated with IOT, Icloud computing, mega data and AI technology.

#7 Beijing MFOX Technology Co.,Ltd

MFOX is an in-house brand of TechFaith. Foxcube is a smart codebase software development platform developed by MFOX, integrating licensing, customization and development. This platform offers Saas service and provides integrated cloud+ terminal modules, smart operational terminals and cloud service.

#8 Nanjing Shenzhou Aerospace intelligent Tech Co. Ltd

Nanjing Shenzhou, also known as China Aerospace 3D Print Research Center, is a high-tech company which integrates overall solutions for intelligent manufacturing, aerospace intelligent education, 3D Printing Service and related equipment and application of machine vision and virtual simulation, etc. manufacturing and sales, Research.
