

List of accompanying enterprises to attract investment in Europe

NO.	Company name	Surname and personal name	Post	Intention to sign	Enterprise profile
1	Koeman Medical	Yi Mingsheng	President	Order amount: US \$2 million	Shenzhen koeman medical equipment co., LTD., founded in 2002, more than ten years, hand in hand to domestic and foreign research institutions and higher institutions, through the combination of production closely, koeman concentrated resources, in the electrophysiological monitoring, ECG diagnosis, ultrasonic monitoring, respiratory anesthesia, baby care, operating room equipment and so on six big areas, in-depth research, continuous technological breakthrough. Koeman products are widely used in medical institutions at all levels, medical education institutions, medical research institutions and social service guarantee institutions. Koeman has developed and manufactured a special neonatal monitor and a special cardiovascular monitor. The accuracy of product monitoring data fills the gap in domestic and world specialties. As a world-renowned medical equipment manufacturer, adhering to the concept of end-user

					centered, it has more than 40 branches around the world, and has provided high-quality products and services to 270,000 medical security institutions in 130 countries and regions.
2	Beitre New Materials	Li Zikun	President of the Academia Sinica	/	Beitre New Materials Group Co., LTD., founded in August 2000, is affiliated to the listed company —— China Baoan Group Co., LTD., LTD. In 2015, Beitre was listed on the New Third Board and listed on the North Stock Exchange in November 2021. Berry is a technology innovation as the leading, leading technology, products and industrial chain layout, international and domestic mainstream customers, with lithium ion battery anode materials, cathode materials and new materials as the core products, industry status of new energy materials research and development and manufacturers, research and development team has 800 people, revenue reached 25.6 billion yuan, has been authorized patent more than 580 items, 2019 "Chinese enterprise patent 500" the third.
3	Xinwangda Electronics	Zheng Guohua	Assistant president	Order amount: US \$3 million	Founded in 1997 and listed in the Shenzhen Stock Exchange in 2011, Xinwanda Electronics is a global leader in the field of lithium-ion batteries. With the mission of "Innovation-driven New energy World Progress",

					<p>Xinwangda is deeply engaged in the field of lithium battery, and is committed to providing more green, fast and efficient new energy integration solutions for the society. The company has built 3C consumer battery, power battery, energy storage system, intelligent hardware, innovation and ecology five businesses. After nearly 30 years of hone, the company not only formed a profound technical accumulation in the field of lithium battery, technology reached industry leading level, also realize business "multifaceted", become the field of 3C consumer battery, among the top ten global power battery installed capacity, energy storage system in the top in the country. As national technology innovation demonstration enterprise, the national ministry of digital pilot enterprises, smartphones with lithium ion battery module was identified as the national "manufacturing individual champion" products, also repeatedly listed manufacturing top 100 private enterprises in Guangdong province (15), China top 500 private enterprises (218), the global new energy enterprise 500 (37), by overseas institutions Benchmark assessment for global power battery level manufacturers, and won the millet, vivo, geely, dongfeng nissan customer honor awards.</p>

4	DiMai biological	Zhai Liuwei	Chairman	Order amount: 2 million euros	<p>Dai Biotechnology Co., Ltd., located in Shenzhen, China, is a national high-tech enterprise specializing in the research and development, manufacturing, sales and service of medical devices and reagents in the field of in vitro diagnosis. Dai is an innovation-driven company with more than 40% of its r & d staff and spends more than 20% of its annual revenue. Dymind Has a national blood cell reference measurement laboratory approved by CNAS. Since its establishment, Timai has applied for more than 500 national patents, and all the products have been recognized by the international authoritative quality management system. As a doctoral workstation in Guangdong Province, Dai has established a series of university-enterprise research and training bases with Shenzhen University and Southern Medical University. As blood routine project and specific protein joint detection innovators, emperor mai launched independent research and development of joint detection analyzer, including blood routine and CRP joint detection analyzer, the world's leading 5 parts and 3 parts of joint detection blood analyzer, consumption less automatic blood routine and CRP joint detection analyzer and used for blood routine joint detection analyzer. CRP and SAA have promoted the new breakthrough in blood</p>

					analysis equipment and further improved the efficiency of diagnosis and treatment in medical institutions. In the competition with domestic brands, The market share is expanding, ranking the second in the blood testing market. Today, Dai's products and services have reached more than 120 countries and regions around the world. Through increasingly mature joint testing solutions and high quality clinical diagnostic products and services, Dai has always cared for health with medical innovation.
5	Race bridge biology	Shang Fang	Chairman	Sign the consultant cooperation agreement	Was founded in 2020, by a number of tsinghua university precision instrument excellent Dr With the German national academy of engineering, European academy of sciences professor you-ming zhang, is a CGT intelligent manufacturing solutions provider, focus on CGT industry upstream key manufacturing technology and complete sets of core process equipment source of technology innovation and localization, is committed to realize the industrialization of CGT equipment fully closed, automation, digital and flexible.
6	Wei Guang biological	Zhang Zhan	Chairman	/	Shenzhen Weiguang Biological Products Co., Ltd. is a national high-tech enterprise, the only blood products production enterprise in Shenzhen, and a state-owned
7		Jin Jianjun	Marketing	/	

			Director		holding listed enterprise in Guangming District. Founded in 1985, the company is mainly engaged in the research and development, production and sales of blood products, including human blood albumin, intravenous human immunoglobulin and a total of 11 varieties and 23 specifications. The company has won many honors such as "Guangdong Independent Innovation Demonstration Enterprise", "Shenzhen Science and Technology Innovation Award", "Shenzhen Top 100 Quality Enterprises", "Shenzhen Top 100 Brands" and so on. After nearly 40 years of development, the company has developed into a leading domestic blood products enterprise with high comprehensive utilization rate of plasma, complete product range and strong research and development strength.
8		Zhang Yunjia	Research and development director	/	
9	Believe in biology	Zhang Xie	Co-founder	/	Xinxin Biology is a delivery technology platform company, mainly engaged in the development of nucleic acid drug delivery technology. It is one of the few hard technology companies in the international scope that have mastered the underlying technology of lipid nanoparticles (LNP). Believe that Biology has the world's leading LNP delivery technology with independent intellectual property rights, and has a global patent layout.

10		Yunfei Li	Chairman		China-Belgium Energy Technology Co., Ltd. is a world's leading new energy technology enterprise integrating the research and development, production and sales of lithium batteries. It is the first lithium battery company listed in China on NASDAQ. Adhering to the original aspiration of "green life driven by electric energy", we are continuously committed to the development of the world's new energy and environmental protection technology industry. Its main business covers new energy vehicles, light electric vehicles, communication energy storage, consumer electronics and power tools and other new energy application fields.
11	Compared with energy	Dai Huabin	Deputy General Manager of Dalian Company	/	
12	Skyworth photovoltaic	Qu Wanfei (to be confirmed)	Executive President of Skyworth Photovoltaic (wife of Lin Jin, chairman of the board of directors)	Order amount: RMB 20 million	Skyworth photovoltaic, affiliated to skyworth group, founded in January 2020, controlled by Shenzhen skyworth RGB electronics co., LTD., is a collection of photovoltaic and other new energy mode of power station development, design, construction, intelligent operations and professional consulting services as one of the whole process assets development and construction operation platform (DEPCO), specializing in distributed residential roof photovoltaic power station, industrial and commercial enterprises roof power station design, construction, operations, carbon trading and energy storage business and

			of Skyworth Group)		other integrated services. The company takes "photovoltaic + Huimin finance + digital technology" as the guiding ideology of its business model, and has achieved the industry benchmark in terms of business model, product quality and customer service. Skyworth has been at the forefront of the industry; automotive intelligent system and intelligent residential system business have entered the application market; participated in the launch of National Ultra HD Video Innovation Center, leading the whole industrial chain of next generation display.
13		Fu Zhenyu	Head of the overseas headquarters		
14	Dongjiang group	Joerg Deters	European Sales Representative	/	Founded in 1983, Dongjiang Group (Holding) Co., Ltd. is the world's leading one-stop provider of injection molding solutions, headquartered in Hong Kong, China. The company is mainly engaged in the manufacturing, sales, OEM, production and modification of mold and injection molding components business. Its business covers the injection molding production of smart phones, personal care and smart home products, packaging medical care, personal care and precision electronics and other high precision, high cavity and high performance molds, as well as the research and development, design and

					manufacturing of automotive molds and other medium and large complex molds.
15	And group tai	Dragon color hua	vice president	Order amount: 5 million euros	Shenzhen Heertai Intelligent Control Co., Ltd. was established in 2000. Relying on the background of China's top universities, it has been deeply engaged in the field of intelligent controller for more than 20 years. As one of the world's leading intelligent controller enterprises, the company has always adhered to the core development strategy of technology leading, focusing on the investment of research and development technology. Our core R & D team has more than 15 years of R & D experience and has applied for more than 2000 core patents, making Heertai one of the companies with the most patents in the world, the R & D most powerful team and the most professional technical solutions in the field of intelligent controllers in the world.
16	DE embellish electronics	indeterminate	Group vice President	Order amount: 3.8 million euros	Founded in 1989, Derun Electronics was listed in Shenzhen Stock Exchange in 2006. It is mainly engaged in the research and development, manufacturing and sales of electronic connectors and precision components. Its products are widely used in household appliances,

					<p>computers and peripheral equipment, communications, smart phones, new energy vehicles and other fields. Run electronic as the leading domestic manufacturer of connector, in the domestic consumer electronics connector market leading enterprise position, in order to adapt to the development of 5G and connector industry development of the new situation new demand, is committed to the development of high-speed transmission connector, promote TypeC, CPU connector products such as technology upgrades, and expand the connector products, increase the communication, in the field of automobile products, especially in the field of 5G application. The automotive connector and wiring harness business has entered the supply system of first-line automobile manufacturers, which further enhances the market competitiveness of the company; the company's mature new energy on-board charger has outstanding leading advantages, and is in the leading position in the industry in charging power, charging efficiency, integration and many other aspects. It is the world's first manufacturer to launch a 22kW800V platform high-power on-board charger, representing the current leading level of the industry. With the technical quality advantages and empirical experience,</p>
--	--	--	--	--	---

					it has the global first-line brand customer resources, and has supplied vehicle chargers and other products for well-known domestic and foreign automobile brand manufacturers. With the development of the new energy vehicle industry, the market is expanding rapidly, and it is becoming the core supplier of on-board charger products in the global new energy vehicle field.
17	Xi De sheng	indeterminate	Regional Head of Europe	indeterminate	<p>Shenzhen Xidesheng Bicycle Co., Ltd., hereinafter referred to as Xidesheng Company, was established in 1995, headquartered in Guangming District, Shenzhen. As a high-tech enterprise integrating research and development, production, sales and service, We has become one of the leaders in the bicycle industry. The company covers an area of 450 mu, the annual production capacity of more than 10 million vehicles, the products won the title of "China famous Brand", its "XDS" trademark was rated as "China well-known trademark".</p> <p>The company not only occupies an important position in the domestic market, but also covers more than 50 countries or regions and regions around the world, sales channels throughout more than 30 provinces, cities, autonomous regions, and has more than 2000 stores. The</p>

					company has advanced equipment and manufacturing technology, covering the upstream from carbon fiber, aluminum alloy, magnesium alloy new materials research and development to automated manufacturing, sales channels of the whole industrial chain layout.
18	Kelu electronics	Xie Fei	Nordic Regional Manager	/	Shenzhen Kelu Electronic Technology Co., Ltd. was founded in 1996 and listed on the Shenzhen Stock Exchange in 2007. It is a state-level high-tech enterprise with a state-recognized enterprise technology center. The company's main business focuses on smart grid and new electrochemical energy storage, and its strategic vision is to become a first-class energy service provider in China and even in the world. In the field of energy storage, the company is one of the earliest enterprises to layout energy storage, is a leading enterprise in the energy storage industry, and is also one of the few domestic energy storage system integrators to enter Europe and the United States. In the field of smart grid, the company has been the core supplier of China and South Grid for many years, and the overseas business of smart grid covers many regions of "Belt and Road". There are more than 3,000 employees, more than 260 invention patents, more than 340 software

					Copyrights.
19	Zhi Jia can	indetermin ate	Regional Head of Europe	/	Shenzhen Zhijia Automation Co., Ltd. was founded in 2003, focusing on the field of automation for more than 20 years, is a national high-tech enterprise integrating research and development, production, sales, installation, commissioning and after-sales service. As a leader in the intelligent manufacturing industry, its business covers advanced component capacity solutions for lithium batteries, industrial automation systems, photovoltaic field solutions, intelligent software systems, etc.
20	Ruifeng photoelectri c	indetermin ate	Overseas regional leader	/	Shenzhen Ruifeng Optoelectronics Co., Ltd. is a world-renowned innovative technology enterprise integrating research, development, production and sales of LED and LED application solutions. Scientific and technological innovation, leading technology and product differentiation are the core competitiveness of Ruifeng Optoelectronics. Ruifeng Optoelectronics has successively arranged and promoted the development of lighting, display, automotive, electrical, touch display and other professional fields, and established a deep strategic cooperation with the global first-line brands. At present, the company will focus on research and development and

					business layout in emerging fields such as vehicle lighting display, Mini LED, Micro LED and touch display electronic paper, so as to enhance the company's core competitiveness and sustainable profitability.
21	Friends trade mechanical and electrical	Xie Dongliang	chairman	/	Youmao motor (Shenzhen) Co., Ltd. is a professional research and development and production of DC motor enterprises, products are sold at home and abroad, by the world famous manufacturers affirmed. The company was founded in 1976, headquartered in Shenzhen, Guangdong province. With the expansion of business scope, the company established the first and second factories in 1993 and 2002 respectively. At present, the plant area reaches 40,000 square meters and the monthly capacity can reach 10 million DC motors.
