Job Opening for Product Engineer

BCM SENSOR TECHNOLOGIES BV, Schoten/Antwerp

Company

BCM SENSOR TECHNOLOGIES BV, established since January 1996, becomes a leading manufacturer of force-related industrial sensors and a global player with sensors and sensor technologies.

BCM SENSOR is a well-known brand name in international market. Our sensor products play important role in force-related measurements and have been widely installed for factory automation and process control, instrumentation, robots, IoT, and intelligent manufacturing by many of famous customers worldwide.

Our added value to customers includes Quality, Precision, and Reliability of both products and services. For details about BCM SENSOR, please visit www.bcmsensor.com.

We have a young and enthusiastic working team, and we have been getting our products sold mostly to European countries and to other countries worldwide. We invest in continuous quality improvement, technological innovation, and customer satisfaction.

Job Position

Product Engineer

Job Description

BCM SENSOR is seeking for Product Engineers, on a permanent basis, to join a young and enthusiastic working team at the company.

The role is responsible for R&D, product documentation, and technical support to customers and colleagues.

This is a good opportunity to join a leading sensor company and play an important role in the team of good work ethic with a range of products of high quality.

Education, language, and skills

- bachelor or master in electro-mechanical engineering, mechanical engineering, industrial automation, Robots, IoT, intelligent manufacturing, or applied physics.
- Fluent in English and Chinese as working languages, knowledge of Dutch or German as plus point.
- proficient in AutoCAD or Solid Works in making 2D or 3D engineering drawings.

Duties

- compose product documents, e.g., product drawings, datasheets, and user manuals.
- create product newsletters, FAQ, editorial articles, and product advertisements.
- update product information and FAQ on company website.
- provide technical support to customers and colleagues, and guidance to suppliers.
- perform quality control on incoming goods to maintain and improve product quality.
- process and manage quality complaint and returned goods from customers.

BCM SENSOR TECHNOLOGIES
