Shanghai Shengsheng Logistics Co., Ltd. is a professional bio-pharmaceutical cold chain logistics company who focuses on providing safe, professional and efficient cold chain logistics solutions for customers in life science, biotechnology, drug research and other fields which we support our customers to concentrate on R&D and production.

With headquarter in Shanghai, Shengsheng builds regional distribution centers in more than 30 cities in mainland China. Our logistics specialists cover more than 200 cities across the country, and we can provide you with door-to-door cold chain logistics services delivered by 4-48H nationwide. Based on the domestic cold chain network, we extend our high-quality services to worldwide and provide door to door service as well for customers. We operate successful experience for many years in clinical trials, biological samples and IVD logistics. We are familiar with transportation-related laws and regulations, and we have most of the aviation, railway and highway resources. Shengsheng are proficient in cold chain logistics management and temperature control packaging solutions. Before each shipment,

our experts will prepare contingency plans for possible problems to ensure your goods are safely and efficiently delivered.

Our employees strive to be enterprising, pursue excellence, and aim to become the core of biology in the field of logistics.
