- DUTCH : Basic
- CHINESE : Quite fluent

CAPACITIES ET SOCIAL SKILLS

- During my studies, I had the opportunity to develop my team spirit in order to cooperate with my colleagues. Now, thanks to my analytical mind, I have learned how to overcome disagreements and conflicts that can come out in small working groups. From now on, I have the ability and the experience in order to cope with contentious situations which jeopardize the goal we want to reach together.
- Throughout my two student jobs at the Department store « Galeria Inno » and at the chocolate factory « Neuhaus », I have learned how team work and good management are important.
- I had the opportunity to go twice to China (the first time for 5 months and the second time for 1 year). Thus, I have developed the ability to adapt to a new environment socially and culturally different.
